

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

Claims 1-6 (canceled)

7. (previously amended) A hand-held wireless telecommunications unit displaying images to a user, comprising:

a ~~hand-held~~ body having a keypad;

a display displaying at least one visually perceptible display and at least one auditory display, wherein:

said visually perceptible display comprises at least one central display screen and at least one additional screen disposed from said central screen;

wherein said at least one additional screen is guided and deployed in a co-planar position relative to said central screen of said hand-held body of said wireless telecommunications unit; and wherein said at least one additional screen is guided between an outward deployed position and an inward storage position;

wherein said at least one additional screen is attached slidably within said body of said unit; and,

wherein said slidable at least one additional screen is spring deployable, and wherein said slidably attached at least one additional screen slides with urging from said spring between an outward deployed position and an inward storage position.

8-9. (canceled)

10. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said telecommunications unit is a cellular telephone.

11. (previously amended) The hand held wireless telecommunications unit of Claim 7

wherein said telecommunications unit is a wireless personal digital assistant.

12. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said telecommunications unit is wireless Internet Web based personal electronic organizer.

13. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said visually perceptible display is at least one liquid crystal display screen.

14. (previously added and amended) The hand-held wireless telecommunications unit of Claim 7 wherein said auditory display includes at least one sound producing means.

15. (previously amended) The hand-held wireless telecommunications unit of Claim 7

wherein said at least one additional slidably attachable screen is a plurality of screens.

16. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said at least one slidably attached screen comprises at least one screen slidably attached to the left side of said at least one central display.

17. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said at least one slidably attached screen comprises at least one screen slidably attached to the right side of said at least one central display.

18. (previously amended) The hand-held wireless telecommunications unit of Claim 7

wherein said at least one slidably attached screen comprises at least one screen slidably attached to the left

of said central display and at least one screen slidably attached to the right of said central display.

19. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said at least one additional screen is co-planar with said at least one central display.

20. (previously amended) The hand-held wireless telecommunications unit of Claim 7 wherein said at least one central display screen is powered by a first driver electronics circuitry controlled by imaging software and said at least one additional screen is powered by a separate driver electronics circuitry controlled by imaging software.

21. (currently amended) The hand-held wireless telecommunications unit of Claim 7 wherein said central display screen and said at least one additional screen are both powered by a common driver electronics circuitry controlled by imaging software.

22. (currently amended) The hand-held wireless telecommunications unit of Claim 7

wherein said at least one central display screen displays a first image on a screen powered by ~~said~~ a first driver electronics circuitry controlled by imaging software and said at least one additional screen displays a second

image on said additional screen powered by ~~said~~ a second driver electronics circuitry controlled by imaging software.

23. (previously amended) The hand-held wireless telecommunication unit of Claim 7 wherein said at least ~~on~~ one central display and said at least one additional screen display respective portions of a single image.--
